

Port Hueneme Division Naval Surface Warfare Center

Environmental Policy Statement

I am committed to the conservation and protection of our environment. Consistent with our national defense mission, we will integrate environmental excellence into our day-to-day business operations and practices.

Every employee at PHD NSWC is responsible for environmental compliance. We will support environmental awareness through training, communication, and integration of best practices into our activities. Together, we will continually look for ways to improve our performance in environmental management and compliance.

In order to achieve our goal of superior environmental stewardship, we will do the following:

- Fully comply with all the applicable Federal, State, and local environmental laws and regulations
- Program and budget sufficient resources to support environmental requirements
- Continuously improve our overall environmental performance
- Implement strategies that will eliminate or reduce our environmental aspects
- Develop and maintain emergency procedures to mitigate environmental impacts
- Ensure efficient and responsible use of energy, water and other natural resources
- Incorporate pollution prevention in our planning and acquisition processes
- Reuse or recycle whenever feasible to reduce hazardous waste streams and disposal costs

Our success depends on your continuous support of fulfilling the objectives outlined above. Environmental compliance and conservation are not a one-time task but an ongoing way of doing business that touches all of our daily activities.

We, therefore, will work together towards achieving this goal.
